NEW SYSTEM--Computed tomography combines the most advanced technology in electronics and computer science to produce an X-ray image of a thin cross-sectional slice of the body. A representative from the Picker Company spent time educating CT Techs Jim Cross and Brian Clock, seated, while Dr. Patrick McNamara, Chief of Radiology looks one.

Schools set April 8 deadline for deciding overcrowding issue

By Shirley D. Schmoock

A self-imposed deadline for deciding the school overcrowding problem has been set for their April 8th meeting by the Crawford AuSable School Board.

In a two-hour work session Monday night, March 23, called specifically to confront the issue of overcrowding in the school system, board of education members, principals, and school administrators examined their eral problems identified such as young what to do for the next school year. options for solving the problem.

For the fall of 1992, both elementary schools and the middle school are expected to be seriously overcrowded. Additional class sections will be needed at the elementary levels but there is no more space. The middle school is expected to be about 100 students over capacity.

Currently, Grayling Elementary principal Barbara Mick gives up her own office for three half hour sessions each week and it is not uncommon to

hold some classes in the hallways at children sharing library space and one instructor more than 300 students. moving classes to the high school.

short-term solutions open to them and all the short-term options have drawbacks. Mixing or moving grades to other schools was discussed with sev-

the three schools. The band program materials geared toward high school also expects another one hundred 5th students. Many social difficulties were grade students added next year, giving also discussed with the option of

Renting space temporarily or buy-School officials felt there were few ing prefabricated school units was considered as the most expensive shortterm option for the school district.

Let's Talk About It

By Joe Murphy

After the timber was cut in this area many folks were trying to come up with a plan to make the cutover land pay off. Farming was tried with limited success but the poor soil in this area soon played out except for a few areas where hard woods grew made fertile land. Ranching was tried all the way from the Lapland rein deer ranch that Rasmus Hanson tried to cattle, sheep and hogs. A sheep ranch was tried in the area south and west of Frederic. What is now known as the Watershed Club over on the Manistee was the in those days. headquarters buildings. A lot of land they gave up on it. The Underhill Ranch over near Lovells tried cattle with no better success. The South few years. An effort was made to make the pine stumps pay off by producing turpentine from them with some success. But piece by piece a great deal of the land of Crawford County reverted to the State of Michigan for taxes owed. Even though taxes were low at that time there just was no money to pay them. A little research in the old tax records shows most of Crawford County was privately owned at one time.

I think if a man today owned a section of good pasture land and a hundred or so acres of fair farm land

to raise hay for winter feeding he would have a going concern. It was almost six months of winter feeding that kept those early tries at cattle ranching in this area from success. Haying used to be a lot more difficult than it is today. With the haying equipment of today one or two men can do the job it took a big crew to do

This country would be like the was ferced in but after a short time land of milk and honey to the cattle that I saw trying to pick a living in Wyoming, If you see that country out there you can see why the cattle Branch Ranch was another try and ranches need thousands of acres. there was the J.K. Ranch on Lynn Most of the country I saw cattle on Lake in southern Otsego County. out there you would need at least The Ward orchard and the AuSable forty acres per cow. In the days Fruit Farms did pretty well for a when Crawford County was open while but were abandoned after a range my Dad used to run quite a few cattle as did most of the farmers around here. When open range ended so did most farming in this area as the farms were too small to keep enough cattle to make it pay.

> I sure hope by the time this appears in the paper we will be enjoying some of those fine springtime days. The past few days have been pretty cold; someone was telling me this morning he had a temperature of 14 below at his place. But we know winter has just about had it and spring is on the way. Still I wish it would hurry up a little.

Public knowledge of voting preference is not American

Tuesday the 17th I voted for a choose the employee who would vote Democrat in the Michigan Presidential in accordance with the employer's best Primary election.

Information like this should not be accessible to the Public, nor does it seem constitutional or right to force a voter to choose a party preference before allowing them to vote.

What is the point of having a booth with a curtain or a ballot without a signature if how I vote is a matter of public record for anyone to look up? Doesn't our constitution give us the

right to vote privately in an election? Perhaps voter turnout would exceed 20 percent in this state if the people voting could vote confidentially.

prejudice in an electoral system that will be open to public scrutiny?

Isn't there a greater danger of

A potential employer having two equally deserving job applicants could interests. Union organizations might be

inclined to hire a Democrat rather than a Republican.

Judges and election officials in the past were to remain impartial in an election but now, thanks to our new primary system their votes will be forever a matter of public record.

I don't know who is responsible for the change in the primary rules but state elections director Chris Thomas' office blamed the State House of Representatives who in 1988 almost unanimously voted this into law.

To me this is not only unconstitutional but un-American. shame on you.

> Raymond G. Priebe Jr. Grayling

Residents want to police their neighborhood through peer pressure

In the past, AuSagra Acres family housing units getting a facelift this projects." spring, but the tenants are taking pride in where we live.

We have hopes of our small community becoming a safe and beautiful environment to raise our children. We are in the process of forming a tenant council. All tenants are asked to participate. We hope to be able to police our community through peer pressure. We will no longer tolerate less than ethical behavior from our neighbors.

AuSagra Acres is on its way to housing units has had a less than becoming a source of pride for the favorable reputation. We are here to citizens of Grayling not a source of inform everyone that not only are the shame. We will not become "the

Seven ways to wage war

IT PROBABLY SHOULD not both Iraq and Korea at once. be a surprise, but the Pentagon apparently wants to keep a strong military presence for the United States throughout the world.

According to a couple of recent New York Times articles which appeared a few weeks apart, military thinkers can foresee all sorts of possibilities throughout the world which require the United States to maintain a strong and alert military presence.

So much for the heralded peace dividend.

communist presence in Eastern Europe, American militarists lost their most prominent and longeststanding rival.

So, with the evaporation of the communist military challenge, American military needs also are expected to be lowered. But maybe

The first New York Times article cited an internal Pentagon planning document made available to the newspaper "by an official who wished to call attention to what he considered attempts within the military establishment to invent a menu of alarming war scenarios."

THE ARTICLE CITED seven possible situations in which the United States could find itself at war during the next ten years.

One would be a new war against internationalism." Iraq, another would be fighting against North Korea, and a third

A fourth possibility "envisions a major military campaign in Europe to prevent a resurgent Russia from pursuing expansionist aims," the Times reported.

A fifth scenario would be a military coup in the Philippines endangering American lives and interests there, and a sixth would be action in Panama, with terrorists endangering access to the Panama Canal.

The final war possibility, according to reports of the secret Pentagon papers, would be with "a global adversarial With the winding down of the rival," or an "international coalition with an aggressive expansionist security policy."

American defense leadership, the report indicates, will seek forces and weaponry to handle the U.S. role in all these possible situations. The Times reported that the seven war scenarios "will serve as the foundation for longrange budget planning and determining the number and kind of troops and weapons the country should maintain."

Times report appeared on the seven chances for war, the newspaper produced another article, citing another inside document, in which the United States is claimed to favor "concept of War world is a delicate matter. Cost benevolent domination by one power" —the United States, of course — over

In simpler words, it appears to be a policy of the U.S. against the world would be simultaneous warfare in or at least, the U.S. developing and

maintaining enough military strength so all countries will realize we are the most powerful military nation on earth. It's a continuation of the policy of peace-through-

The Times claims that the National Security Council and the President or "his senior national security advisers" have been involved in developing the go-italone strategy.

WITH THE END of the Cold War, many Americans hope that the American military presence will be decreased considerably around the world. Indeed, there have been closing of bases, cancelling of weapons systems, reduction of armed forces.

How far demobilization should proceed is at the core of the military planning, cited by the two New York Times articles.

Undoubtedly it will not go as far A FEW WEEKS AFTER the as many non-military observers would prefer.

Hopefully, it will go further than the stronger militarists would hope.

Our military role in the post-Cold —and therefore, tax load — is only one of the many important the possibility of "collective considerations, and it should not be neglected.

> But security is also important. The proper balance will be difficult to achieve.

Dave Lovely kicked off his campaign for Crawford County Sheriff Tuesday, March 10, with a spaghetti dinner. Over 200 people attended the fundraiser held at the Legion Hall in Grayling. "We were really pleased with the turnout," Lovely said, "especially

Lovely Campaign Kickoff Big Success

considering the snow storm. I was glad we had fifteen people here working. Everyone stayed busy the whole night." "This demonstrates that the people in the county are concerned about the Department," commented Allen Lowe, Lovely's campaign

chairman. "They know that they need a full time sheriff. That's what Dave is offering them." Dave and his wife Shelly (Fick) are life time residents of Crawford County. He has over sixteen years of law enforcement experience including four years in the military as a part of the Air Police. He has

been working for twelve years as a Crawford County deputy. Lovely stated, "The campaign is going just great. We have had a good response from almost everyone. The only negative comment we hear is my age. Most people don't realize that I am old chough to run for President this year."

Dave is a candidate in the August Republican primary. The seat is being vacated by outgoing Sheriff Harold "Bum" Hatfield.

Verse or Worse

By Joe Murphy

Good Memories

I often recall those childhood days And all those great folks I knew back then Those folks whemade life a Joy when I was a boy Live within my old mind again

There was mymom and dad, those parents I had Who ge always so close in memory Who thoughthey passed away many years ago They're alyays there in my mind to talk to me

My clasmates in our old Frederic school Arealways there as in days of yore run and play most every day Just as we did before

Thise kindly folks that took the time tell you stories of days gone by Or p sing songs of the old lumber jacks till see and hear in my mind's eye

laring and caring was so common It was just our way of life So different from our world today With all its crime and strife

The was a welcome walting at every door friendly face to greet you with a smile They were the kind of folks who would take the time To talk to you awhile

> How I treasure those good memorles Of all those fine folks I knew back then And some day in God's promised land I'll see them all ágain

The Bible Speaks

From The Calvary Baptist Church

Last Hope

Our Lord Jesus Christ reminded us in Luke 18:9-14 that self-righteous people go to hell, and saved sinners go to heaven. We will all be surprised to find people from many different cultural and religious backgrounds in heaven, and more surprised to see many religious people we highly respect be accursed." (GAL 1:8, 9). Paul going to hell.

I have personally met many dear saints from different religious backgrounds living in Grayling. Most of us were saved in spite of our religious backgrounds, and not because of them.

Some Baptists are trusting "invitational regeneration," (going forward in church during the invitation), to assume they are saved. Some are trusting "baptismal regeneration" in which salvation is assumed through the waters of baptism. own self-righteousness of good works.

have deceived people who are trusting person, work, and word of Jesus Christ the wrong gospel to be saved.

The great apostle Paul said, "But though we, or an angel from heaven, preach any other gospel unto you than that which we have preached unto you, let him be accursed. As we said before, so say I now again, If any [man] preach any other gospel unto you than that ye have received, let him placed a curse of damnation upon anyone who preached any gospel except the gospel of the grace of Jesus Christ. "I marvel that ye are so soon removed from him that called you into the grace of Christ unto another gospel." (GAL 1:6). The gospel of God's grace means that salvation is all of God and not of human works. As Paul said, "For I delivered unto you first of all that which I also received. how that Christ died for our sins according to the scriptures: And that Others are trusting their family he was buried, and that he rose again background. Many are trusting their the third day according to the scriptures." (I CO 15:3,4). Salvation So all churches and denominations comes through personal faith in the

alone.

Salvation must be "according to the according to "the grace of Christ," "He that hath the Son hath life: [and] he that hath not the Son of God hath not life. These things have I written unto you that believe on the name of the Son of God; that ye may know that ye have eternal life, and that ye may believe on the name of the Son of God." (1JO 5:12, 13). Do you know you have eternal life today? Only by

A "Perfect" Rose

Look closely at a so-called perfect rose! Scan the petals. You will find they are far from perfect. The uneven shapes, blemishes or misshapen stems will not spoil the delicate color, rich fragrance and sheer beauty of the total flower. How clearly a rose illustrates that nothing in life is truly perfect! But, rather than discourage us, this should give us fresh

God did not make the rose perfect--nor did He make us perfect. Yet, He thinks none the less of us for our faults and blemishes. In His eyes we always have another chance, but it is

In the Matter of the Petition of the State Treasurer of Michigan, in behalf of mid State, for the sale of certain lands for taxes assessed thereon. I reviewed the petition of the State Treasurer who is requesting a judgement in favor of the State, against each percel of land therein described, for the amounts claimed to be due for taxes, interest and charges on each percel of land, and that the lands be sold for the amounts claimed by the State.

It is ordered that the petition will be brought on for hearing and judgement at the April term of this court, to be held at Grayling, in the County of Crawford, State of Michigan on the 6th day of April, 1992. At the opening of Court on that day, all persons who have an interest in the lands or any part thereof, who wish to contest the lien claimed by the State, shall appear in this court and file their objections with the clerk on or before the first day of the term of this Court mentioned above, and a judgement will be made as requested in the petition if the amounts due are not pald.

It is further ordered that the lands described in the petition, will be sold for the taxes, interest and charges on the first Tuesday in May thereafter, beginning at 10:00 A.M. on that day or days after, that are no ceasary to complete the sale of each percel, at the office of the County Treasurer, or at a location selected by the Treasurer, at the County seat of the County mentioned

This sale will be open to the public and each percel described in the judgement shall be separately of leged for sale and sold to the person who pays the full amount charged against the parcel and accepts the smallest undivided interest in the property. Any parcel of land that is not sold on the first of fering shall be reoffered on the anceseding day, or before the close of the sale. If not sold on the second offering the County Treasurer shall bid off the parcel in the name of the State.

Witness the Hon. Alton T. Davis, Circuit Judge, and the seal of the said Circuit Court of Crawford County this 24th day of January 1992. S/Hon. Alton T. Davis

Countereleved

Blizaboth H. Wieland, Clerk

STATE OF MICHIGAN In the Matter of the Petition of the State Treasurer of the State of Michigan, in behalf of said State, for the sale of certain lands for taxes assessed thereon. To the Circuit Court for the County of Crawford;

Douglas B. Roberts, State Treasurer of Michigan, shows unto the court: 1. That he is the State Treasurer and files this petition under the provisions of P.A. 206 of 1893, as amended, and P.A. 380 of 1965, as amended. 2. That the attached Schedule A is the tax record required by the act and contains the description of all 27 lands in the above county upon which taxes were

assumed for the years mornioned therein and have remained unpeld for more than one your after they were returned delinquent. 3. That the amounts opposite each description of land are (a) the total smown of delinquent taxes which may is wfully be sold at the next aroual tax sale. (b) interest calculated as provided by law to the first day of May, (c) a county property tax administration the of

expenses, all in accordance with the act maritioned 4. That all of the taxes, interest and charges are emit and the roll accompaide beniamer evan bus bilay to require the sale of the lands against which they were assessed at the next annual tax sale, and constitute a valid lien upon each of the percels of land, and that a judgement be issued in favor of the State against the land for the payment of the amounts specified, and if not paid, that the lands be sold.

four percent, with a minimum of \$1.00, and \$10.00 for

Therefore your plaintiff requests: a. That within the time provided by law this court determines that the aforesaid taxes, interest, and charges are valid and constitute a valid lien upon each of the parcels of land described in Schedule A: b. That within the time provided by law this court

against each parcel of land for the payment of the taxes, inscreet, and charges in Schodulo A, and that the amounts listed in the column headed "Aggregate" shall constitute the amounts adjudged against the lands, unless so amended by this court;

c. That if the amounts in the schedule are not paid, the lands, or the portion that is necessary to satisfy the amount adjudged against the lands, shall be offered separately at the tax sale as the law provides: d. That your plaintiff may have such other and further relief that this court finds just and equitable. Date: January 21, 1992

Township **Board Regular Meeting** March 10, 1992

Members present: M. McNamara, J. Medler, R. O'Mara, M. Ashton, A. Stancil. Members absent: None. Others present: Tracy Libby, Tara Bentalan, Amold Randall, Petra Hellthaller. Supervisor Stancil opened the meeting at

7:30 p.m. Motion by McNamara/Medler, carried, to approve minutes of February 11, 1992, with a correction in Item 6 that the seminar tabled was not Telephone Skills but Business Grammar

and Usage. All ayes. Motion by Ashton/Medler, carried, to receive the Treasurer's report for February as presented.

CORRESPONDENCE: (No action required) Crawford AuSable School District Board Happenings at 2-17-92; Consumers Power regarding clearance of trees near electric lines, C. C. Board of Comm. minutes for 1-29-92,

City Mgt. to Crawford County regarding Landfill Use Agreements. BUSINESS: Motion by McNamara/O'Mara, carried, to

request Market Value Adjustment Report from Manulife on employee pension plan. All ayes. Motion by McNamara/O'Mara, to remove Business Grammar and Usage Seminar from table. All ayes. Discussion, no action.

Motion by Ashton/Medler, carried, to authorize Stancil to attend Michigan Land Use AND AND A MODEL Law in the 90s Seminar in Traverse City on April 29, 1992, Roll call: All ayes at 1000 65

Motion by McNamara/Medler, carried, to accept Richard Ferrigan's bid to construct a two piece portable work station for the Treasurer's office and, also, purchase of a security cash drawer for said unit. Roll call: All ayes. Discussion of bid from L. H. J. Associates for

computer hardware and Manatron software to computerize the appraisal system in the assessing dept. Questions on the necessity of two additional computers. No action. Motion by O'Mara, support by Ashton, to

accept the recommendation of the Planning Commission and adopt the revised Grayling Township Zoning Ordinance, to be known as ORDINANCE 92-2, which will become effective April 20, 1992. Current Grayling Township Zoning Ordinance 83-4 will be repealed on April 20, 1992. Ayes: five, Nays: none, motion carried. No communication to date from Lee Riley

regarding statistics needed to determine the Township's voluntary contribution to the project conventing the DNR garage on Michigan Avenue to an ambulance housing facility. Stancil will O'Mara requested that the AT & T

representative be asked to attend the April 14th meeting to discuss the proposed office telephone Reports:

Supervisor reported light turnout for the March 10 and 11 Board of Review. Building Department: Written/on file.

Motion by Medler, support by McNamara, to accept the recommendation of the Grayling Township Election Commission and authorize alteration of the Grayling Township Election Precinct boundary lines to coincide with the 1992 revised Crawford County Commissioners Districts.

Pct. 301 District 6 Pa. 302 District 2 Pct. 303 District 4 Pat. 304 District 5 Alteration will be in effect for the 1992

August Primary. Ayes: five, Nays: none. Motion carried.

Medler suggested the Board consider contributing to a community project in the form of capital improvements, perhaps youth oriented. Concensus: The Board would be pleased to consider any ideas presented.

Medler requested Stancil to inquire regarding Camp Lehman's community notification procedure for escapees.

Motion by O'Mara, support by Ashton, to approve bills on youchers 14572, 14581 through 14604, Board and Commission fees of \$416 and Guardian auto check for \$200,20 for a total of \$7,721.67. Roll Call: Ayes: five, Nays: none. Motion carried. Motion by Medler/O'Mara, carried, to

adjoum. Monica S. Ashton, CMC Grayling Township Clerk

Important Notice Relative To **Delinquent Taxes**

Because the list of Delinquent tax lands for tax sale advertising must necessarily be made up several months ahead of time in order to get it in the printer's hands, several descriptions are included in the Crawford County list on which taxes have been paid.

IF YOUR 1989 AND PRIOR YEARS TAXES HAVE BEEN PAID YOUR LAND CANNOT BE SOLD IN THE MAY 5, 1992 TAX SALE.

If you have not paid your taxes and your land is listed for sale, you must pay at any time up until Monday, May 4, 1992.

We shall be glad to answer any other questions you may have about the tax sale here at the Treasurer's Office.

> Joseph V. Wakeley **Crawford County Treasurer**

GRAYLING TOWNSHIP NOTICE

The Grayling Township Planning Commission will meet at 7:00 pm, Tuesday, March 31, 1992, in the Conference Room of the Grayling Township Hall, 2090 Viking Way (M-72 West) to hold a public hearing regarding the following request:

Case 92-2: Donald D. Howse, petitioner Property Code: 20-044-030-004-040-01 and 20-044-030-004-100-00 Location: Koch Road off M-93 North Sec. 30, T27N, R3W. 13 acres m/l.

A request to rezone from Recreational Forest (R-F) to Industrial (I) for the purpose of auto salvage and repair as a Conditional Use.

Case files and zoning map may be examined at the Township Office during regular business hours.

Correspondence concerning the request should be directed to Grayling Township, P.O. Box 521, Grayling, Ml. 49738. Telephone: (517) 348-4361.

> Monica S. Ashton, C.M.C. Grayling Township Clerk 28

MANPOWER 114 S. Center, Suite 105B Gaylord • 732-4884

THE NORTHEAST MICHIGAN CONSORTIUM is soliciting resumes and references for eight outdoor instructor positions. Instructors are needed for a summer program which will take place in Michigan's Pigeon River State Forest. It will involve six, 10 day sessions (10 days on/4 days off).

Program components will involve the following challenges: 3 days backpacking/orienteering, 2 days of ropes course and group initiatives, 1 day community service, 2 days of environmental education, and 1 day canoeing.

Individuals applying must be able to lead these challenges as well as be highly skilled in: group counseling, group dynamics, and be experienced working youth who exhibit emotional and behavioral difficulties.

Instructors must be able to help students project program successes into their daily lives. The program will be co-ed as will the Instructional teams. Instructors will be responsible for programming and 24 hour a day

Tentative program dates June 6 through September 4, 1992. Wages: \$100 per student contact day. Preference given to northern Michigan resident. Equal Opportunity Employer.

Send your resume to: Northeast Michigan Consortium, Att: Marlanne Moran, Human Services Coordinator, P.O. Box 711, Onaway, MI 49765 by March 27, 1992. -12-19-26/3 **EMPLOYMENT**

Placid, New York, for the NCSA and **USSA** National Championship finals to compete against 17 other top teams and four individuals from all divisions and regions throughout the United

Jayson Welser, the top skier for Ferris, placed first in state on several occasions throughout the season and near the top in the Midwest in the NCSA finals. He was a 1988 Grayling High School graduate and a Grayling High School skier who made the state championship in both his Junior and Senior year as an individual. Also on the Ferris team is Freshman Pete Oppermann of Grayling.

In the Giant Slalom on Whiteface Mountain on Friday, March 12, the Ferris team had kind of a tough day when Welser lost valuable time by momentarily falling but regained his control to finish 50 out of the 89 competitors. Other team members placed 54th and 65th with two disqualifications. The competition included some World Cup and Olympic skiers and skiers from nearby schools having daily use of area mountains and full time coaches at their disposal.

On Saturday, March 14, Welser's first run placed him 37th out of the 89 skiers but a gatekeeper later disqualified him when he said he stepped on a gate. The second Ferris skier crashed, the third also fell and hurt his ankle and had to climb, the fourth skier finished in 65th and the fifth skier in 67th, placing Ferris in 15th out of the 17 teams.

The Ferris State University Ski Team after placing first in the State and third in the entire Midwest travelled to Lake

New houses can't be beat

By Thomas Baese. **President of Tri-Lakes Home Builders Association**

You've heard the saying, "They they become worn and frayed. don't build homes like they used to." much better. Today's new homes are using the wrong size fuse. Ground safer, healthier, stronger, more energy fault interrupters for bathrooms, efficient, require less maintenance and kitchens, and outside receptacles have more conveniences than ever reduce the chance of fire and

New Homes Are Safer Than Older Homes

six times less likely to die from fire install security systems to protect than occupants of older homes. Homes | homeowners from intruders. built prior to 1970 had a fire death rate of 52 deaths per million housing units, whereas homes built between 1981 and 1986 had only nine fire deaths per

smoke detectors on every level. that if one detector alarm sounds, they required to have battery back-up. This feature allows detectors to function even when the power goes out.

Space heaters and wood stoves, the second leading cause of fire deaths, are not needed in new homes because insulation.

Electrical power systems in new homes are sized for the heavier electrical demands of today's family, and wiring systems are less likely to cause fires. There also are more

receptacles so people need fewer extension cords which can overload circuits, trip people, and start fires as

Circuit breakers have replaced fuse Well, that is a fact. They build homes boxes which can be overloaded by electrocution.

The new Smart House wiring will further reduce the chance of fire and Occupants of new homes are almost electrocution and make it easier to

New Homes Are Stronger

New homes in high wind zones and need painting. Wood decks are earthquake zones are built with extra typically made of pressure-treated bracing and framing anchors. In areas lumber resistant to rot and insects. Many new homes have hard-wired of expansive soils, tests are conducted. Pressure-treated wood is also used and foundations engineered to resist where wood comes in contact with Usually, they are interconnected so or accommodate soil movement, concrete, Basement construction has been all sound. Many smoke detectors are improved to resist cracking, and drains are installed to help prevent leaks.

stronger and quieter than those in older Nearly all new homes are built with homes where board sheathing was used. New types of trusses on roofs climates, central air conditioning. and floors not only increase strength | There are more electrical outlets, as of central heating systems and better but permit greater design flexibility well as outlets for cable and telephones. by eliminating most bearing walls Bathrooms often have more inside the house.

Many builders warrant their new homes for ten years against structural defects under insurance plans, such as the Home Owners Warranty (HOW) program.

New Homes Are More **Energy Efficient**

New homes consume half as much energy as homes built prior to 1980 because of more efficient heating and cooling systems, better windows, control of air infiltration, and improved insulation. Older homes tend to be drafty and less comfortable, and frost and condensation are more likely to in new homes are now tempered so appear on windows, drip down, and that they will crumble when breaking prevention techniques into a new cause deterioration of wood trim and instead of breaking into jagged pieces home.

New Homes Require Less Maintenance

> The Smart House technology will permit even greater convenience because Smart outlets will accommodate electrical lights and appliances, telephone, TV, intercom, and many other types of devices. The system will permit programming of lights, appliances, and security systems. Gas outlets will provide for a new wave of gas appliances.

Glass tub enclosures and patio doors

that can seriously injure people.

New Homes Are Healthier Than Older Homes

Much has been learned about the health risks of certain home building products in the past 20 years. Asbestos has been eliminated from shingles. pipe, cement board, roof tar, floor tiles. ceiling tiles, and insulation. If asbestos fibers become airborne, they can increase the risk of respiratory diseases.

Lead can cause a wide range of physical and mental ailments. It is not used as an ingredient in paint anymore, and it is no longer used as solder for plumbing. Formaldehyde emissions from particleboard and hardwood plywood have been greatly reduced in new homes.

Where radon is a problem, control systems are not being installed. These systems usually include a layer of gravel and polyethylene film beneath basement floors and concrete slabs. Older homes frequently have no gravel in which to collect the gas, no polyethylene film to retard movement of the gas through the slab, and no vent pipes. Mitigating radon from an existing home is generally far more expensive than building radon

Putting a price on your home

By Thomas Baese, President of Tri-Lakes **Home Builders Association**

The general trend in housing prices in your area will give you an idea of how your home may have increased in value over the past few years. And that's important if you intend to put your home on the market — because determining the price at which you should sell your home is the first thing you need to do.

The market price of your home will be determined by its location, its condition, and features and current market conditions in your area.

Comparable homes recently sold in your home to fetch. Whether it goes for a higher to lower price will depend, however, to a great extent upon the individual history of your home covering everything from your yard to indoor and outdoor maintenance, improvements, and additions.

Setting your selling price too high or too low can turn off prospective buyers. It may be advantageous to seek professional outside help when establishing the market value of your

You will receive a written appraisal of the market value of your house and its lot from an independent real estate appraiser. To find a reputable appraiser, ask mortgage officers at local banks, contact the local real estate board or consult the telephone directory under "Real Estate Appraisers."

Real estate agents will draw on their home owner must face forthrightly. wealth of expertise to assist in evaluating the current market value of your house. The cost for this service is usually included in the agent's commission for selling the home.

estate agent, you should probably obtain a second opinion from another broker.

Once you've established the market value of your house, you can determine an asking price, which should provide 5-10 percent difference between the market value and selling price of your your asking price for the home. home is customary.

Frequently asked heat pump questions

Q: I'm considering a heat pump for my new house. The builder said I can use it for both heating and cooling my home. How can this be possible?

A: The electric heat pump is a single piece of equipment that supplies heating in the winter, and air conditioning in the summer. An electric heat pump can supply both heating and cooling because it uses electricity only to transfer heat, not to create it.

A heat pump is essentially a heat absorber. In the summer, a heat pump absorbs heat from the indoor air and "pumps" it outdoors. In the winter, just the reverse happens. Heat is absorbed from the cold outdoor air, and pumped indoors. This is possible because even at 0°F, the outdoor air still contains a lot of heat: almost 80 percent of the heat that it has at 100°F. When the outdoor temperature is below freezing, however, certain types of heat pumps rely on supplemental heating to keep the house warm.

Q: What will it cost to operate my heat pump over the course of a

A: Your actual heating and cooling The design of your house, its geo-

home or remodel your current

Matching virtually any architec-

is, the heat pump's energy efficiency rating, the size of your family household, and especially, how energy-efficient you are will affect the cost. Quite often, even similar homes next door to each other can have greatly disparate heating and cooling costs.

Regardless of where you live, however, a well maintained, standard-efficiency heat pump returns between \$2.00 and \$3.00 in heating or cooling for each dollar of electricity you pay to operate it, according to the Edison Electric Institute and the National Rural Electric Cooperative Association, two national associations of electric utilities. A new, standard-efficiency fossil-fuel furnace (oil or gas) on the other hand, now returns only about \$0.80 in heat for each energy dollar spent to run it.

O: We are concerned about protecting the environment. What impact will our getting a heat pump have on it?

A: Your concern for the environment matches a growing trend around the country. Selecting a high-efficiency electric heat pump will help protect the environment because it uses electricity very efficiently.

The quality of the air you breathe costs will depend on many factors. inside of your house is just as important as the outdoor air. Because a heat graphic location, how well insulated it pump runs on electricity, and does not

of things to come

burn gas or oil, no by-products of combustion enter the outdoor, or the indoor, air.

Q: I want to be sure I buy an energyefficient heat pump. How can I make sense out of the different energy-efficiency claims?

A: The minimum efficiency standards for heat pumps are now 10.0 SEER and 6.80 HSPF for a split-system heat pump (with the familiar outdoor compressor). What do these numbers mean to you as a consumer?

The SEER (Seasonal Energy Efficiency Ratio) applies to the cooling performance of heat pumps and central air conditioners. The SEER tells you how much cooling you get, compared to the amount of electricity you have to buy to deliver that cooling during the cooling season.

The HSPF (Heating Seasonal Performance Factor) applies only to heat pumps. The opposite of the SEER—the HSPF—measures the amount of heating you get, compared to the amount of electricity you buy to deliver that heat during the heating

When you go shopping, what you need to remember is that the higher the SEER and HSPF, the more money you will save each time you operate your heat pump.

Q: I've heard of a special type of heat pump that is installed below the ground. How does this system

A: Since a heat pump uses electricity only to transfer heat, and not create it, it's the most energy efficient heating and cooling system you can buy. A geothermal heat pump, however, uses even less electricity, because instead of exchanging heat with the outdoor air, the geothermal heat pump exchanges heat with the earth or water. The relatively constant year-round temperature of the earth's soil or a deep pond makes it work less to exchange the heat.

During the cooling season, for instance, you'll save up to 30% on air conditioning bills. And during the winter, you'll be heating your house with a system that is more than three times as energy efficient as a fossilfuel furnace.

A geothermal heat pump exchanges heat with the earth by pumping an anti-freeze mixture through underground loops. Depending where you live, you can choose from two types of geothermal heat pump systems. One type is a horizontal loop heat pump. This heat pump uses a horizontal loop of piping that is filled with an anti-freeze mix. The other type of geothermal heat pump is a vertical loop, with holes bored in the earth for the piping. Vertical loop heat pumps are used in areas with rocky soil, or where you have many trees.

A groundwater heat pump has an open pipe to pump water up from a deep well, pond, or lake. After running through the heat pump, the water is pumped back to the source.

The cost to install a geothermal heat pump makes it more expensive than an air-to-air heat pump; depending on your use of the system, however, the energy savings will pay you back the price difference in 3 to 5

Q: I've seen advertised something called an "add-on" heat pump. Our furnace is old, but it still heats our house fine. Would this type of heat pump work for me?

A: The "add-on" heap pump gets its name because it works together with your existing fossil-fuel furnace (oil or gas) to give you a more energy-efficient heating system.

This is how it works. On winter nights your heat pump will heat your home with the highest energy-efficiency ratings of any heating system available. On the very coldest of winter nights, your heat pump turns over the heating duties to the furnace. Each operates only when it is most cost-effective. During the summer months, the same add-on heat pump will cool and dehumidify your house.

We're currently waiving all fees on our Home Equity Line of Credit and our Homeowner's Loan. And unlike some banks, there are no annual fees with these because we home equity loans, either.

Once you apply, you'll get an answer on your loan or line of credit in as few as 24 hours. All you need to do is provide us with the necessary information, including your home's assessed valuation and your existing mortgage.

You can borrow anywhere from \$5,000 to \$50,000 depending on the equity in your home. Use it for a new car, a college education, a boat or home improvements — whatever you want, whatever you need.

And Old Kent offers two types of home equity loans:

Home Equity Line of Credit — offers the flexibility of writing a check whenever you made to check whenever you need a loan.

Homeowner's Loan — offers the comfort of a fixed rate, fixed term loan.

Both offer advantages over many credit cards or installment loans:

Lower interest

FOICINSURED.

- Lower monthly payments
- Tax-deductible interest consult your tax advisor.

The APR on our Home Equity Line of Credit may vary; as of February 5, APRs are 8% or 8 1/2%, depending on the amount of your credit line. The rates on our Homeowner's Loans are very competitive right now, too.

For more information, stop by any of our offices for details — then say yes to this no-fee, no-wait offer now!

> Call 732-2411 in Gaylord, or 348-5435 in Grayling for details.

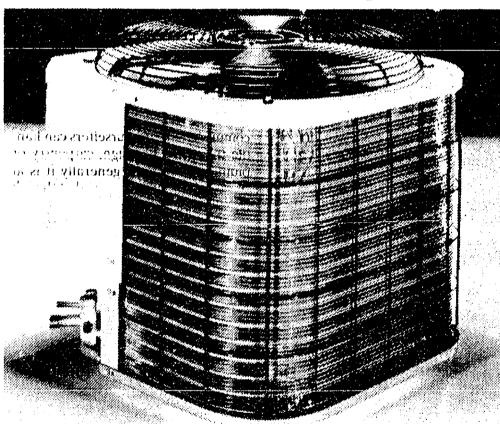

Common Sense, Uncommon Services

APR will not exceed 18% and can go as low as 8%. Fee offer may change. Homeowner's insurance required.

O OLD KENT BANK 1992.

Heat Pump Energy-Efficiency Standards Mean Savings

New efficiency standards lower the operating costs of heat pumps and central air conditioners even more. (Photo courtesy of Bryant Heating & Cool-

If you are like most homeowners, about 60 percent of your monthly energy bill goes towards staying warm in the winter, and cool in the summer. That is a lot of energy and money. Therefore, to get the most benefit from your energy dollars, and to help protect the environment, you should shop for the most energy-efficient heating and cooling system you can

The electric heat pump offers you these energy savings. With the minimum energy-efficiency standards that

went into effect January 1, 1992, the new heat pumps will now return even more value for your money. In fact, a heat pump meeting the new standards will return between \$2.00 and \$3.00 in heating for each dollar you spend to operate the heat pump, according to the Edison Electric Institute and the National Rural Electric Cooperative Association, two national associations

of electric utilities. A split-system heat pump (the one with the familiar outdoor compressor) must now have a minimum effi-

ciency standard of 10.0 SEER and 6.80 HSPF. What do these numbers mean to you as a consumer?

The SEER (Seasonal Energy Efficiency Ratio) applies to the cooling performance of heat pumps and central air conditioners. The SEER tells you how much cooling you get, compared to the amount of electricity you buy to deliver that cooling over the cooling season.

The HSPF (Heating Seasonal Performance Factor) applies only to heat pumps. The opposite of the SEER—the HSPF ratio compares the amount of heating you get, to the amount of electricity you buy to deliver that heat during the heating season. What really matters is that when you are shopping, remember that the higher the SEER and HSPF ratios, the more money you will save each time you operate the heat pump.

An electric heat pump can supply heating and cooling for the same reason it is energy efficient: it uses electricity only to transfer heat, not to create it. A heat pump is essentially a heat absorber.

In the summer, a heat pump absorbs heat from the indoor air and "pumps" it outdoors. In the winter, just the reverse happens. Heat is absorbed from the outdoor air, and pumped indoors (even at 0°F, the outdoor air still contains a lot of heat-almost 80 percent of the heat that it has at 100°F). When the outdoor temperature is below freezing, however, certain types of heat pumps use some supplemental heating to keep a house

Call your electric utility for more information about energy-saving heat pumps. They may offer financial incentives for models that exceed these new minimum energy-efficiency standards. Your electric utility may also be able to help you select a qualified heat pump contractor to install your new system.

Small savings add up

Energy savings make sense all the time. But it makes a lot more sense when times are tough and many homeowner's budgets are tight. "There are some very simple and inexpensive ways in which to reduce high heating and cooling costs," said Matthew Herko of The Home Depot.

The following energy saving tips can assist in saving from \$300-\$500 annu-

ATTIC INSULATION—The size of your house and attic, as well as current utility bills, will determine the actual savings you can get from installing insulation. In many cases, you can save as much as 30 percent on your annual electric bill. Most people will recover their investment in the

course of the first year. WATER HEATER CARE—The next biggest gobbler of electricity in your home is the water heater. If it's hot to the touch, you're wasting a lot of energy. Cover the heater with an insulation blanket kit and use pipe insulating foam around hot water pipes. Also, lower the heater's thermostat to 140 degrees Fahrenheit (60 degrees Celsius) if you have a dishwasher, or to 120 degrees Fahrenheit (40 degrees Celsius) if you don't. Your energy savings will ultimately depend on the number, ages and habits of the people

in your house. **HOT WATER WASTE—Water**saving showerheads and flow restrictors in kitchen and bathroom faucets reduce the actual volume of water that comes out by as much as 20 percent or more but will not affect your washing capabilities in any way. Also, shut the water off when shaving or brushing your teeth and take shorter

SHADE THE A/C COMPRES-SOR-Install a fence (and a partial roof, if you can) or plant high bushes or areca palms around the compressor (outside unit) of your air conditioner, to shade it and help it cool off faster. Leave at least three feet of free room all around the unit to facilitate free air circulation.

CEILING FANS—Ceiling fans help reduce your cooling costs. For each degree you raise your thermostat, you can reduce your electric bill by about 10 percent. In the meantime, a ceiling fan operating at slow speed uses no more electricity than a 15-watt lightbulb.

THERMOSTATS—If there is no | Jim Farren one in the house for several hours at a time during the day, a programmable thermostat will save you money and keep you comfortable. Set it so the air conditioner starts cooling the place about half an hour before your scheduled arrival time.

TIMERS—There are timers for lamps and electrical appliances. Light-sensitive timers will turn on and off depending on the amount of daylight available, whereas clock timers have to be set for specific hours when you need them. Timers can also be used to water your garden during the early morning hours, when it's best to water your plants to avoid evaporation from the strong mid-day sun.

LIGHTS—You may be able to turn off some lights without making your house a dungeon, but an excellent alternative is to use fluorescent halogen lamps wherever possible. They are four times brighter and much cooler than regular incandescents, use up to 75 percent less electricity and last 25 times longer. For outdoor lighting, you might try sun-battery-powered lights and wipe out your electric costs altogether.

CAULK AND SEAL—Estimates indicate that you can save up to 10 percent of your yearly home cooling costs by caulking and sealing all windows and doors. Hold a lit candle next to the gap between a door or a window and its frame. If the flame flickers, you have a draft that can be cured with one of the many sealing kits available. Caulking is best applied around door and window frames, where they meet the wall, as well as around openings to the outside.

OLD APPLIANCES—If any of your major appliances keel over, look very carefully at the yellow tags of potential replacements. They tell you the relative electricity usage of each model as compared to similar ones. Choose the model that best fits your needs and has the lower estimated energy consumption number.

Consider upgrading instead of remodeling

If you're among the millions of kitchen appliances now getting well homeowners who have put kitchen re- into their second decade of operation modeling dreams on "hold" due to the that will require replacement. economy, here are some alternative ideas that can help you keep your dreams alive. Rather than a total kitchen remodeling, consider a "kitchen upgrade" instead. A well thought-out kitchen upgrade may be vour answer. In these "no-nonsense economical solution.

There are, in fact, millions of

to improve your kitchen's appearance and its utility by replacing, on a planned schedule, existing appliances with today's better-looking, more useful ones. It can be done on a smaller scale than kitchen remodeling, withnineties", it just might be the ideal, out the need for architects or interior designers.

For example, it could mean upgrad-

ing from a conventional coil electric range to a smoothtop model. The new smoothtop models are particularly popular in kitchen upgrades. Not only The idea of a "kitchen upgrade" is do they dramatically improve the kitchen's appearance, but they also

> There are several levels of kitchen upgrades that can be undertaken without requiring extensive redesign or remodeling. They are:

make cooking and cleaning up easier.

Minimal. Replace one or two appliances only. This could include range and refrigerator or range and dishwasher or any combination of appliances. It requires planning ahead to ensure that all replacements will fit within your future planned kitchen. Clean sweep. Replace all appliances. Upgrade, for example, to ice-dispensing refrigerators, self-cleaning ovens, smoothtop ranges or cooktops. Usually requires no carpentry or plumbing. Reinforcements. Replace and/or add to appliances. Upgrade from conventional electric range to a new, sleek smoothtop model with, for example, a double oven or oven/microwave combination. This may require rudimentary carpentry, plumbing or electrical

Facelift. Replace and/or add to appliances as above and replace cabinets. countertops and/or floors. Some accomplished do-it-yourselfers can handle this without design, carpentry or plumbing help, but generally it is at this level (or just above it) that the job passes from the "upgrade" to the "remodeling" category.

The three rules for a kitchen upgrade are: Shop, visit and ask. If you should require design assistance, make sure that you select a professional who is a certified kitchen designer (CKD).

You should expect to spend at least a month shopping and learning about the appliances that appeal to you. Start a folder. Visit home shows, open houses and dealer showrooms. Ask your friends about their appliances: what's good and what's not. Look for articles and advertisements. Pick up brochures. Write for information.

features you will actually use.

All Decked Out? We Can Help... If you are thinking about replacing an existing deck or patio, or are planning to build a new one, Stephan Wood Products has the solution for These 18" x 18" Patio Squares are made of pressure treated hardwood to provide a beautiful, long-lasting patio/deck surface. They can also cover cracked and unsightly concrete for a new look that will enhance the beauty of your home. Stop in and check them out!

While you're shopping and visiting, compare prices and services of various stores. Set up a budget and put money aside for the project. Make sure that you spend the necessary time to determine which appliance

Generally, the most worthwhile features are those that are functional and save time and/or ease clean-up, like glass shelves in the refrigerator, selfcleaning capability in ovens, or glassceramic smoothtops on ranges or

Fans beat the heat the economical way

The way most people look at it, there's no trick to beating the heat in summer—as long as you're willing to pay

There is an alternative, however. More and more homeowners are finding that fans can provide them with the cooling effects they seek, without resulting in overwhelming utility bills.

There are a wide variety of powcred ventilators currently available. Properly selected and installed, they can create an indoor environment which remains comfortable all summer long.

Whole-House Fans

Foremost among the energy-saving powered ventilators is the wholehouse fan. Situated near the center of the home, the fan can be used during the summer months to draw in cooler evening air through screened windows and doors, creating a pleasant and comfortable indoor environment. The fan also produces breezes that can make the temperature seem two to eight degrees cooler than it actually

An effective cooling device at temperatures well into the eighties, the cooling burden off of the air-condifor as little as one-tenth of the cost of air-conditioner operation. Useful in all climates, the whole-house fan can replace the air-conditioner in some areas of the country.

The Home Ventilating Institute (HVI), a voluntary organization of manufacturers of static and powered home ventilating equipment, offers a simple method for proper selection of whole-house fans. HVI labels displayed on members' products, show the certified capacity of the fan as measured in cubic feet of air moved per minute (CFM). To determine the necessary CFM rating for a wholehouse fan, multiply the interior square footage of the home (excluding garage, attic or basement) by three. In warmer, more humid climates, a larger capacity is needed, and the square footage should be multiplied by four in those areas. The resulting number is the CFM rating for the fan needed for the home.

It is important for the homeowner to provide sufficient static vents for the whole-house fan to function prop-

whole-house fan can yield substantial erly. To determine the necessary vent energy savings as it takes much of the area, the CFM rating should be divided by 750. The resulting number will tioning system, yet can be operated be the square feet of static vent area which must be provided.

Ceiling Fans

Ceiling fans, devices which have been around since the turn of the century, have enjoyed a rebirth in popularity recently, largely because of their decorative appeal. However, the fans also offer significant cooling and energy-saving benefits to homeowners.

Research has shown that ceiling fans have the ability to make room occupants feel comfortable at temperatures up to 85 degrees Fahrenheit. The ceiling fan's ability to provide cooling effects at temperatures into the mid-80s is of notable significance in terms of energy and cost savings. The fans are extremely economical to operate and can yield substantial savings when used to supplement air-conditioning. Based on 1982 national averages, an article in "Consumer Reports" estimated that the cost for operating a ceiling fan for eight hours would be one-half cent.

The fans are available with shortstem assembly, allowing them to fit easily into rooms with standard eightfoot ceilings, with seven feet of clearance. The fans range in size from 36 to 52 inches across. The smaller models are designed for use in tight quarters such as hallways, small offices, stairways, dining rooms, apartments and small houses where space is at a premium. The larger fans are suited to living rooms, play rooms, large porches, basements, dens, and, thanks to truly silent operation, bedrooms.

HVI cautions consumers to be very careful in selecting a ceiling fan. The organization notes that some fans are built strictly as decorative items and are of almost no value as air-circulating devices. Consumers are urged to determine that the fan has been sturdily constructed to withstand the rigors of operation before they make their purchase.

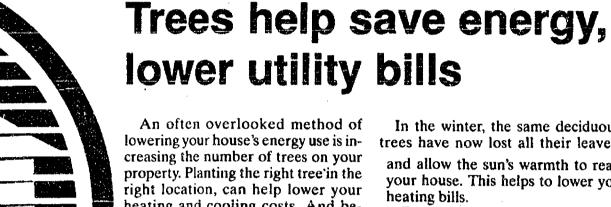

During the summer months, as the sun beats down upon the roof of the house, air in the attic can become extremely hot. As the heat builds up, it can penetrate to the house below, causing discomfort or putting an added burden on a home's cooling system. Further, attic heat build-up poses a threat to insulation and to structural materials, causing serious deterioration of these items. The problem continues in the winter when water vapor produced throughout the house rises to the attic and collects there. It can penetrate insulation, seriously impairing its efficiency, and can also cause damage to other materials in the roof and attic.

The ideal way to combat both unwanted intruders is with a powered attic space ventilator. Mounted on the roof or gable wall, the ventilator removes hot or moist air, replacing it with clean, fresh air from the outside. Equipped with a thermostat, the ventilator automatically comes on whenever the attic temperature exceeds safe levels. In the winter, ventilators equipped with a humidistat activate automatically when moisture in the attic air reaches an unacceptable lev-

To determine the necessary CFM rating for an attic fan, HVI recommends multiplying attic floor area by 0.7 (add 15% for dark roofs). The resulting number is the correct CFM rating for the fan needed to properly ventilate the attic. As with wholehouse fans, the powered attic ventilators manufactured by HVI members are independently tested and certified, and the CFM rating is shown on the HVI label.

Pole Barns

In the winter, the same deciduous trees have now lost all their leaves, and allow the sun's warmth to reach your house. This helps to lower your heating bills.

Evergreen trees should be planted on the north and west side of your house. Here, these trees with their branches of thick green needles, can then block the cold winter winds.

Low trees and shrubs planted close to your home reduce wind currents and create a "dead air" space that helps to reduce heat loss in the winter. It also helps to buffer your home from hot outside air in the summer.

When planting trees, remember to watch out for overhead power lines. Trees with a low mature height, less than 25 feet, are recommended for plantings under power lines. Be sure to check with your electric utility's forestry department, or your local nursery to help you decide which tree

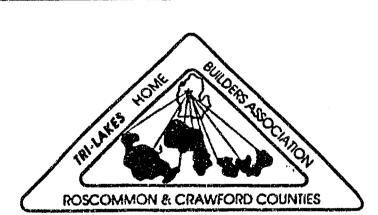

For more information on planting trees on your property, or in your neighborhood, write to the American Forestry Association, P.O. Box 2000, Washington, D.C. 20013, or call (202)

existing homes. Assumes no structural modifications are needed to accommodate added insulation.

(B) The R-value of full wall insulation, which is 3-1/2 inches thick, will depend on material used. Range is R-11 to R-13. For new construction, R-19 is recommended for exterior walls. Jamming an R-19 in a 3-1/2 inch cavity will not yield R-19.

(C) Insulate crawlspace walls only if the crawlspace is dry all year, the floor above is not insulated, and all ventilation to the crawlepace is blocked. A vapor barrier (e.g. 4 or 6 mil polyethylene film) should be installed

migration into the crawlspace.

* Additional insulation not suggested. R means resistance to heat flow. The higher the R-value, the greater the insulating power. Ask your seller for the fact sheet on R-values.

NOTE: For more information see DOE Insulation Fact Sheet (DOE/CE-1080), U.S. Department of Energy, Technical Information Center, P.O. Box 62, Oak Ridge, TN 37830.

Or write for Manville's "Homeowner's Insulation Guide," No. RIG-505, to Manville Inquiry Dept., 1601 Park Ave. West, Denver, CO 80216.

Once you're convinced of the bene-

fits of ducting, check on the installa-

tion. Rangehoods require a minimum

of 6 inch round ductwork. A 4 inch

duct is too small, causing the hood's

motor to work too hard. Exhaust fans,

need a minimum of 3 inch duct work,

but for top performance, a 4 inch duct

If you can, look in your attic at the

straight as possible. Sharp 90 degree

angles are possible with flexible duct,

but the fan's performance will be re-

duced dramatically. If a longer duct

run is necessary due to construction,

use rigid metal duct since it has the

least resistance to air flow. Longer

duct runs may require a higher air movement rating to compensate to

According to Broan, the ducting

should be connected to either a roof

cap or wall cap so that the moisture

and pollutants are removed complete-

ly. If the duct run ends in the attic, the

air is simply being poured into the at-

tic which can destroy attic insulation

and rafters. Broan recommends using

roof and wall caps with a built-in

damper since they eliminate cold out-

side air from coming inside. Check to

see that the roof or wall cap's damper

operates properly, opening only when

the fan is operating.

is recommended.

the long run.

Clean indoor air important in homes

It's hard enough keeping the house clean from dirt, mud and dust without having to worry about the quality of air in your home. But, clean, healthy air affects not only your family's comfort, but the long-term maintenance of your home as well.

Today, homes are built air-tight for energy savings. But that means houses don't breath—exhausting bad air and replacing it with fresh air. Take the kitchen for example. Cooking, broiling baking and frying produce great Duct runs should be as short and amounts of grease particles, smoke, odors and moisture. These pollutants can cause grimy cabinets, soiled curtains and gritty ceilings and walls. In the bathroom moisture can rust metal cabinets, shorten the life of wallpaper. paint and tile adhesives. And, since trapped moisture rises, it can deteriorate joists and framing above the bathroom.

Yes, you can open the bathroom door while showering, but that just causes the moisture-laden air to travel to another part of the house looking to escape. And yes, you can open a bathroom window, but that's not practical in many parts of the country during the winter months.

"Spot ventilation in the kitchen and bath captures moisture at the source before it can cause discomfort or damage," according to Jerry Santowski, President of Broan Mfg. Co., Inc., which manufactures kitchen and bath ventilators. Range hoods and bath fans, if properly installed, help those air-tight homes to breath.

Even the U.S. EPA (Environmental Protection Agency) recommends the use of exhaust fans and range hoods in reducing indoor air pollutants in their publication, "The Inside Story: A Guide to Indoor Air Pollu-

To Vent Or Not To Vent

Range hoods and exhaust fans can either be installed ducted or duct free. Ducting or venting means that the moisture and pollutants are exhausted to the outside of the home through duct work. Duct free models use filters to clean the air and then recirculate air back into the room. However, duct free models do not remove the moisture from the air.

According to Broan, ducting is always the recommended installation. Because of time restraints, builders or homeowners, oftentimes opt for the easier duct free installation.

"In the long run, ducting the range hood or exhaust fan provides the greatest investment in your home." according to Santowski, "by eliminating costly future repairs to joists, window scals, insulation and paint."

Insulation recommendations can help lower energy costs and protect the environment

Heating And Cooling Account for Up to 70% Of Home Energy Use

With the rapidly rising cost of energy, and the expectation that it will continue to climb during this decade, homeowners are more than ever looking for ways to reduce their utility bills.

According to the U.S. Department of Energy, 50% to 70% of the energy used in the average American home is for heating and cooling. Another 20% is for heating water. Everything else combined accounts for just 10% to 30% of utility bills.

So though it's important to turn off lights and appliances when not needed, the way to substantially reduce energy costs is to decrease the amount of energy used for heating and cooling.

The DOE states that most of the existing houses in the U.S. are not insulated to optimal, recommended levels, and that adding insulation may save enough money in reduced utility bills to pay for itself within a few years, and then continue to save the homeowner money as long as he or she lives in the home.

DOE Recommends Insulation R-Values

To guide owners of existing homes, and builders of new ones, the DOE has published updated R-value recommendations.

R-value is the measure of thermal resistance by which insulation is specified. "R" means resistance to heat flow. The higher the R-value, the greater the insulating power.

The DOE recommendations divide the country into eight insulation zones, with specific R-value guidelines for ceilings, floors and exterior and crawlspace walls.

Homeowners can verify the precise recommendations for their specific area with their building materials dealer, insulation contractor, public utility or state energy office.

The DOE points out that insulation not only saves money, but also helps reduce the rate of depletion of our nation's limited energy resources. In addition, it can make a home more comfortable by maintaining a uniform temperature throughout the house.

Walls, ceilings and floors will be warmer in the winter and cooler in the summer. Fewer drafts mean the house will remain comfortable at lower thermostat settings.

Insulation also acts as a sound absorber, keeping noise levels down.

duct run. Some of the duct runs look the a roller coaster of twists and turns. Insulation Can Offer Additional Benefits

Some states offer a tax credit for money spent on measures to reduce home energy use, including added insulation, weatherstripping and caulking, says the DOE.

In fact, many states are presently considering endorsing the 1989 "Model Energy Code," which has even stronger R-value recommendations than those of the DOE.

State energy offices can be a valuable resource for information, while local utility companies also often provide technical advice. Some even offer rebates or financing assistance.

A home energy audit will identify the amount of insulation already in place, any additional amount needed, and can recommend other improvements such as installing storm win-

Insulation Priorities

The DOE considers the following to be the key insulation priorities:

Insulate the attic to the recommended level, including the attic door, or hatch cover.

Insulate under floors above unheated spaces, and around walls in the basement, crawl spaces and foundation, and on the edges of slabs on grade.

Consider exceeding recommended levels of insulation for exterior walls of existing houses, particularly when remodeling or re-siding, or for new

R-Value Map Available

The recommended R-value map and chart are also available in color in the "Homeowner's Insulation Guide". published by Manville, the makers of gold fiber glass insulation.

This 16-page, illustrated pocketsize guide covers everything from how to determine if you need more insulation to how to install it.

It contains brief, simple instructions, with clear color sketches showing how to insulate new and existing attics, floors, crawl spaces, walls and the little spaces around windows and

Financing options to fit your wallet

By Thomas Baese, President of Tri-Lakes **Home Builders Association**

Before you go in to talk with a mortgage lender, you should become acquainted with what's available and how the system works. There are many types of mortgages on the market today. You can shop and choose the mortgage with the terms and payment plan that best suits your needs.

Adjustable Rate Mortgage interest. (ARM)—these loans have a fluctuating interest rate based on an economic indicator, such as the costof-funds index or U.S. Treasury Bill index. Rate and payment "caps," which limit the amount that the rates and payments may increase within any given period, are included in the provisions of the loan.

Fixed Rate Mortgage—usually 30or 15-year loans, with monthly loan. The payments are based on interest rates quoted when the loan is of the interest and the principle.

created to assist home buyers who are to housing costs in your area. priced out of the market by high

paying off the mortgage obligation in requirements. 15 instead of 30 years. Monthly payments increase by a small of this monthly increase is applied

There are also "loan programs" which insure the mortgage will be repaid to the lender and allow the borrower a lower downpayment and/ or interest rate. The most common loan programs are FHA-insured, VAguaranteed and conventional.

FHA-Insured. These loans take their name from the Federal Housing Buydown Mortgage—this plan Administration (FHA) which does not offers a lower interest rate by paying a lend the funds, but insures loans made portion of the interest payment in a by FHA-approved lenders. The lump sum at settlement. The payment borrower pays for the insurance at can be made by either the buyer or the closing, or as part of the monthly payments. You can get an FHA loan with fixed or graduated payments.

Because the loans are FHA-insured. payments constant over the life of the many lenders will accept lower downpayments from the buyer. Interest rates are also slightly lower initiated. Each payment includes part due to the insurance. There are no prepayment penalties on these loans, Graduated Payment Mortgage but lenders are allowed to charge (GPM)—this financing plan was points. FHA loan limits vary according

VA-Guaranteed. The Veterans monthly payments or fixed-payment Administration (VA) does not actually loans. Payments are reduced in the lendfunds—it guarantees payment to first years of the morigage and are lenders on loans made to qualifying designed to gradually increase at a rate veterans. No downpayment is required commensurate with the anticipated because of the guarantee. Lenders are increase in the buyer's income. To not permitted to charge prepayment achieve the initially lower payments, penalties on VA loans, and borrowers the difference in the monthly mortgage are not permitted to pay points,

payment is added to the loan balance. although they must pay an origination mortgage insurance on the loan. Growing Equity Mortgage fee. Loan limits are controlled by the Lenders are permitted to charge points (GEM)—a fixed-rate mortgage that lenders. Check with your local VA and prepayment penalties on offers the homeowner the option of office or lender for qualification conventional loans.

"conventional" when the payment of percentage each year; the total amount the debt depends primarily on the borrower's ability to pay. on these loans since they lack the insurance or guarantee that accompanies FHA and VA loans. However, smaller downpayments are

When negotiating any of the above Conventional. A loan is called mortgages, your lender will discuss the interest rate and any points that will be charged in addition to the loan. Prepayment penalties may also be towards the principle instead of the Downpayments are generally higher mentioned. With some loans, a prepayment penalty is charged when the loan is paid ahead of schedule. The fee compensates the lender for the interest that would have been collected generally accepted if there is private over the negotiated term of the loan.

Tax advantages for homeowners

By Thomas Baese, President of Tri-Lakes **Home Builders Association**

Did you know there are tax advantages available only to homeowners? Although tax laws are changing year to year, owning a home remains one of the best investments and tax advantages you can choose. As a homeowner, you can deduct:

•Real estate taxes

 Mortgage interest payments Points paid for a mortgage

Real Estate Taxes—The full amount of annual real estate taxes (also called property taxes) is a plumbing, air conditioning, or heating won't bump their heads upon arising. permissible income tax deduction for systems. all homeowners.

Mortgage Interest Payments—In interest paid on your mortgage. For sell. example, interest payments on a 30year, \$100,000 mortgage at ten percent interest amount to almost \$10,000 the home. This amount is an authorized of your profit is tax-free. deduction - AND it represents a major savings for you. In addition, if you pay off your mortgage early, any fee paid as a prepayment penalty is considered tax-deductible interest.

Points Paid For A Mortgage-You can also deduct, as interest, the points paid to a lender to obtain a new mortgage, provided that the payment represents compensation paid to the lender solely for the use of money. rather than for any specific services. The points are fully deductible only in the year of payment. If such a deduction causes a material distortion of your income, the payment may be deducted proportionately over the life of the mortgage.

Your tax advantage as a homeowner continue as long as your interest, real estate taxes, and other deductions exceed the standard deduction. With a fixed rate, regularly amortized mortgage, the amount of taxdeductible mortgage interest declines over the lifetime of the loan as an increasingly larger share of monthly payments is applied to repayment of the principal.

The advantages of homeownership continue even when you decide to sell your home. If you sell your home, the tax on any profit will be deferred if you buy and occupy another home of equal or greater purchase price within 24 months before or 24 months after the sale of the old residence.

For example, a home bought 10 years ago for \$40,000 might be worth

\$100,000 today, giving you a \$60,000 profit if you were to sell. But if you buy another house that costs \$100,000 will be deferred. The tax is not avoided good after dark. — it is simply deferred until the home is later sold in a taxable sale that does helpful hints on chandeliers: not involve the purchase of a home of greater or equal value.

The profit you receive from the sale can be further reduced for deferment when you deduct the following:

•The cost of all improvements you made to the home: a new roof, the addition of a room, and installation of

incurred during the 90-day period most cases, you can deduct ALL of the before you entered into the contract to

And there's a special tax break for people 55 or older. If the home you sell has been your principal residence during the first year after purchasing for at least three of five years, \$125,000

66More value for your money...that's why State Farm insures more homes than anyone else. 99

Craig A. Combs - Agent 201 Huron Street Gravling, Mi (517) 348-9313

CALL ME.

State Farm Fire and Casualty Company Home Office: Bloomington, Illinois

Like a good neighbor, State Farm is there.

YOU'RE SITTING ON A GOLD MINE.

If you thought you'd have to travel far and wide to find a gold mine, there may be one much closer to home than you realize. In fact, it is your home---the equity in your home you've built up over the years making your house payments. Now with GSB's Golden Credit Line, you can loan yourself money based on that equity.

Once you've established a Golden Credit Line, you have a ready line of credit up to 80% of the value of your home, less your current mortgage balance. You can access Golden Credit Line through your checking account. And because the loans are tied to your home, you may be able to write the interest off against your income tax. (You should consult a tax advisor regarding the deductibility of interest costs.)

Golden Credit Line is an excellent way to provide yourself with a line of credit, enjoy potential tax benefits and avoid paying loan fees. But only if you apply before March 31. Stop in at any GSB office, or call 348-7631 in Grayling or 732-8900 in Gaylord.

*Appraisal and recording fees totaling \$142 are waived. Normal title insurance fees for a Golden Credit Line ranging from \$120 to \$400 is waived on all applications taken on or before March 31, 1992. The Annual Percentage Rate on A Golden Credit Line is 2% over the highest prime rate published in the Wall Street Journal during the month. Annual Percentage Rate (APR) example: if during the month, the highest prime rate published in the Wall Street Journal is 6.50%, the interest rate applied to your Golden Credit Line would be Member FDIC 8.50% APR. Should the prime rate change, your interest rate will be adjusted at the beginning of the following month. The maximum interest rate will not exceed 18% APR.
